

RFP 7487 VEHICLE PRESSURE WASHER SERVICES SCOPE OF WORK - STANDARDS AND SPECIFICATIONS

Vendor/contractor will provide heated, pressure washing equipment supplies for cleaning of City fleet vehicles, construction and specialty equipment and maintenance services for the customer owned pressure washer.

Customer owned system specifications:

- Hotsy Model 982SS Stationary hot water pressure washer
- Natural Gas Heated
- 3.9 GPM
- 2,000 PSI
- Electric 230VAC
- Overhead trolley system for hose above wash bay

Required services:

- Scheduled quarterly pressure washer equipment inspection and service
- Supply of vehicle fleet wash product
- Monthly monitoring and replenishment of bulk fleet wash product

Vendor/contractor shall have the capability to respond to requests for service and repair as needed to keep the washer fully functional during normal daylight hours.

Vendor/contractor shall be responsible for monitoring bulk fleet wash product levels and replenishing as required.

Vendor/contractor shall be responsible to immediately repair or replace equipment or component determined to be in poor operational condition at time of inspection.

Vendor/contractor's equipment and services are to be compliant with all Federal, State, OSHA, and Local applicable regulatory requirements. All cleaning chemicals should be bio-degradable, environmental friendly, and safe to all user's health and well-being.
